Frontend Engineer & AI Training Specialist

Computer Science graduate with hands-on experience building interactive, high-performance web applications and participating in AI model evaluation. Skilled at leveraging modern frontend frameworks (React, Next.js) and integrating complex AI APIs, with a strong foundation in RLHF methodologies. A detail-oriented professional with a proven ability to deliver scalable technical solutions in fast-paced, remote environments.

WHY HIRE ME — KEY QUALIFICATIONS

- ✓ BSc Computer Science — strong analytical foundation
- ✓ Strong frontend engineering skills (React, TypeScript, Tailwind)
- ✓ Experienced with RLHF, Prompt Engineering, and model evaluation
- ✓ Proficient in creating responsive, high-performance web interfaces
- ✓ 95%+ accuracy rate on quality audits and AI response ranking
- ✓ Self-managed remote worker with a flexible schedule
- ✓ Strong written communication & feedback skills

RELEVANT EXPERIENCE

Frontend Engineer (IBBUL-Years)

2024 – Present

Independent Projects

- Engineered a highly interactive Next.js web application utilizing Framer Motion for complex scroll-based animations and page transitions
- Implemented robust media handling components with Intersection Observers for scroll-aware video playback and lazy-loading performance optimization
- Integrated @react-three/fiber and Three.js for immersive 3D graphics rendering, elevating visual storytelling and user engagement

Software Engineer (Python)

2023 – 2024

Independent Projects

- Developed an interactive 2D Snake game in Python using Pygame, demonstrating a solid grasp of object-oriented programming
- Implemented core application logic including state management, grid-based rendering, and real-time collision detection
- Designed an efficient game loop to optimize rendering performance and ensure smooth, responsive user input handling
