SAMUEL RAPHEL

Generalist AI Trainer | Model Output Evaluator | Frontend Developer

Nigeria (Remote) | yorinobuarasaka761@gmail.com | +234 912 283 1994 | linkedin.com/in/samuelraphel-ab53bb293 | github.com/gojoisretarded | my-portfolio-new-steel-eight.vercel.app

Professional Summary

Generalist AI trainer and data annotator with hands-on experience writing prompts and reference answers, grading model output for correctness, instruction-following and completeness, and flagging responses that are confidently wrong, self-contradictory or off-question. Computer Science graduate and frontend developer who reads carefully, explains reasoning in clear written rationales, and flags unclear instructions instead of guessing.

Core Skills

- **AI Training:** Prompt Writing, Reference Answer Writing, Model Output Evaluation, Response Grading, Rubric-Based Scoring, Data Annotation, Quality Assurance
- **Reasoning & Review:** General Reasoning, Instruction-Following Assessment, Fact-Checking, Error Identification, Written Rationales, Handling Ambiguous Tasks
- **Technical:** React, Next.js, TypeScript, JavaScript, Python, Node.js, PostgreSQL, LLM APIs (OpenAI, xAI), Multi-Agent Systems, Tailwind CSS, Git
- **Communication:** Technical Writing, Copywriting, Documentation, Community Management

Professional Experience

Generalist AI Trainer & Data Annotator | Outlier AI

Remote | Ongoing

- Wrote prompts and reference answers on everyday and general-reasoning questions, covering the context a complete, correct response must account for.
- Graded model responses for factual correctness, adherence to the exact instruction given, and completeness without padding.
- Identified and documented confidently wrong claims, internal contradictions and answers to questions that were not asked, with precise written justifications.
- Flagged ambiguous or unclear task instructions to keep evaluations consistent and accurate.

AI Trainer & Data Annotator | Luel.ai

Remote | January 2026

- Annotated and reviewed AI training data against detailed project guidelines, maintaining consistent quality across tasks.
- Evaluated model outputs for accuracy and relevance and wrote clear rationales for each rating.

Freelance Frontend Developer & Web3 Builder | Self-Employed

Remote | October 2026 - Present

- Building Hood Lab (2026), an intelligence and culture platform tracking retail investing's move to onchain finance, combining Robinhood Chain data, Stock Token information and verification, market activity and a research archive.
- Built AI Nation Wars (2026, worldorder.tech), an autonomous multi-agent system running 7 AI country parody accounts on X that find real news, roast each other and remember every feud, posting 100-185 times a day.
- Designed its output-quality pipeline: every post passes deterministic gates (repetition, cooldowns, rate and length limits) plus a separate AI judge and safety model, with a ledger that prevents double-posting, daily spend caps and a guard that pauses paid work when credits run out. Stack: Node.js, Postgres, X API v2, xAI Grok, OpenAI, Next.js on Vercel, Ubuntu VPS.
- Delivered responsive web apps, token dashboards and an e-commerce storefront for clients.

Copywriter & Community Manager | Web3 Projects (Freelance)

Remote | 2023 - Present

- Wrote launch copy, whitepaper analyses and community messaging for 8+ crypto projects across BNB Chain, Base, Solana and Robinhood Chain.
- Moderated online communities, drove engagement and enforced zero-tolerance policies on spam and scams.

Intern | Nigerian Capital Market Institute (NCMI)

Nigeria | August 2026 - Present

- Drafted and managed official correspondence on behalf of the institute.
- Moderated virtual training programmes for capital market professionals, coordinating facilitators, sessions and participant engagement.

Education

B.Sc. Computer Science | Ibrahim Badamasi Babangida University, Lapai | 2020 - 2025

Work Location

Based in Nigeria; available for remote, contract-based work.
